Turin, March 14. *N. S.*

YEsterday a Regiment of Foot, which has been here some time in Garison, marched to Chieri, and was relieved by another Regiment of new rais'd Forces. A Levy of 4000 Men is making in Switzerland for our Duke's Service; 2000 of them are to be put into several Garisons in this Dutchy, and the Forces which are at present in those Places will be sent into the Field. The Train of Artillery and several other Necessaries for the use of our Army are ordered to be got ready by the first of the next month, and all other Preparations are making with the utmost Diligence for an early Campaign. The German Forces continue to make Excursions in the Milanese, and that part of the Monferrat which belongs to the Duke of Mantua, and seldom come home without a good Booty.

Warsaw, March 15. The Congress of the Confederated Nobility of Poland, which is assembled here, has been adjourned some days, in Expectation of the Crown General's coming, who arrived here the 10th Instant, and was present in that Assembly yesterday and this day: Some Members have insisted, That in pursuance of the Resolution they have lately taken for declaring the Throne vacant, such Publication thereof may be made as is usual in the like Cases: but others were of Opinion, That this should not be done before the Treaty with the Swedes were concluded: Whereupon it was resolved, That the Ministers of that Crown should be desired to hasten the Conclusion of it. Letters from Cracow say, the King of Poland was gone from thence to Sendomir, where the Nobility continue very well affected towards him; as does likewise the Dutchy of Lithuania, and the best part of the Forces of the Crown.

Basle, March 22. Monsieur de Mellarede, Envoy from the Duke of Savoy, has presented a Memorial to the Canton of Bern, dated the 14th Instant, to acquaint them, That the Cantons of Zuitz, Undervalden, Zug, and Glaris, had consented to the Levies desired by the Duke his Master, which had been accordingly begun in those Cantons 8 days before, and that the Canton of Uri was ready to do the same; by which it appeared how ready the Catholick Cantons were to concur in supporting the Resolutions, which he expects this Canton of Bern will take, for preventing their whole Country's being surrounded by the Arms of France, and to oblige that Crown to withdraw its Forces out of the Duteey of Savoy: And he further tells them, That he is ready to enter into a Negociation, in order to agree to such Articles with them, on his Master's part, as may be necessary for settling a perfect Neutrality for that Dutchy. All our Advices from Languedoc agree, That the Sevennes and all the neighbouring Country lie under the greatest Calamities, as well from the Camisars, as from the Roman Catholicks, who, under pretence of taking up Arms to oppose them, do ravage the Country, and plunder as well their Friends as their Enemies. They are under great Apprehensions of an Insurrection at Nismes; to prevent which the Marshal de Montrevel has ordered the Guards to be reinforced; and that a Company of Foot should constantly patrole in the Streets.

Copenhagen, March 25. On the 11th Instant Lieutenant-General *Fleming* arrived here from *Berlin*, with a Commission from the King of *Poland* to sollicite this Court for Succours; and yesterday he waited upon the King, but without any Ceremony, having no Publick Character. The King intends to make a Progress in *Holstein*; and it is said he will be going thither about the beginning of *May* next.

Vienna, March 19. On the 17th Instant Count *Draskowitz* arrived here, being sent by General *Palfy*, Ban of *Croatia*, with the News of a considerable Advantage which he had obtained over the Malecontents on those Frontiers at *Czakathurn*; a Town situate in an Island, which is formed by the Rivers *Muhr* and *Drave*, where they had taken Post some Weeks ago, and were very troublesom to the neighbouring Country by their frequent Excursions. Lieutenant General *Palfy* having resolved to drive them from thence, put himself at the head of 1500 *Croatians*, who had been drawn together for that purpose by Lieutenant General *Heister* and Count *Rabatin*, and of 100 Dragoons of Count *Trautsmansdorf*'s Regiment, and attacked the Malecontents with so good Success at several times on the 9th, 10th and 11th Instant, that about 1500 of them were killed upon the place, and a considerable number besides were taken Prisoners, or drowned in their Retreat: Among the slain were found three Colonels who had Commissions in their Pockets from *Ragotzi*. The Loss of the Imperialists was inconsiderable. Preparations are also making on this side to drive Count *Caroli*, and the Malecontents under his Command, from *Eisenstadt*, a strong Castle whereof they have possessed themselves, about 7 Leagues hence. This Service is to be performed by General *Heister*, who is now at *Koting Ebersdorf*, 4 Leagues from this Place, and by to morrow night will have under his Command 7800 regular Troops, in which number will be included about 900 *Danes*, who having been quartered some days in our Suburbs, marched hence this morning, in order to join him.

Francfort, March 27. The *French* continue their Preparations in *Alsace*, with Intent (as is generally believed) to endeavour to send a considerable Reinforcement to their Army in *Swabia*; but whether they will attempt to force the Lines of *Biehl* and *Stolhoffen*, or to repass through the *Black Forrest*, or through the Territories of the *Swiss* Cantons, is yet uncertain. In the mean time all possible Care is taken on the part of the Allies to prevent their Designs: A Line is making from the *Black Forest* to *Swisserland* to cut off the Enemy's Communication that way. The Lines of *Biehl* and *Stolhoffen* are put into as good a posture of Defence as is possible, and several Bodies of Troops are posted along the *Rhine* in those Places where it is probable the Enemy will attempt to pass over that River; for the better opposing of which the States of the Circle of the *Upper Rhine* have been desired to cause their Forces to march thither with all possible Expedition. Prince *Lewis* of *Baden* is at present indisposed; but has resolved, as soon as the State of his Health will permit, to repair to the Lines of *Biehl*, to put himself at the head of the Forces which are posted there.

Hague, April 1. *N. S.* The States of *Holland* and *West-friseland* met here this day. Their Resolution in relation to the Nomination of the General Officers who are to command the Forces of this State the next Campaign has been agreed to by 4 other Provinces, and the Consent of those of *Zealand* and *Overyssel* is daily expected, as is also a Deputation from *Zealand*, to settle some Matters that are in dispute between the States General and that Province. The 15 *Dutch* Battalions which are now in *Germany* are ordered to march towards the *Moselle*, the States have resolved that a Body of Forces should draw together on that side under the Command of General *Slangenbourg*. The Commission of General of the Artillery, which became vacant by the Death of Monsieur *Coehoorn*, is not yet disposed of; but it is generally thought that it will be bestowed on Monsieur *Goor*. A Convoy with Recruits and Cloathing for the *English* Forces arrived yesterday from *England* in the *Maese*. We have an Account from *Germany*, That a strong Detachment of the Malecontents in *Hungary* had been defeated by General *Palfy* on the Borders of *Croatia*, 1500 of them being slain; and that General *Heister* was to march the 22d of the last Month with the Forces under his Command to attack their main Body.

Plimouth, March 21. Her Majesty's Ships the *Glocester* and *Southampton* sailed hence the 19th Instant to the Eastward; as did also this day Her Majesty's Ships the *Lime*, the *Mary* Galley, and the *Hector*, the last bound to St. *George*'s Chanel, with 3 Coasters under her Convoy. This morning came in here the *Thomas and Gregory* of this Place, *John Jennings* Master, from *Nevis*, laden with Sugar, and bound to *London*; but the Wind blowing very hard at N. E. she was forced off to Sea again, and is supposed to be gone for *Falmouth*.

Chester, March 22. His Grace the Duke of *Grmond*, Lord Lieutenant of *Ireland*, embarked at *Dublin* the 19th Instant, about two in the afternoon, and landed yesterday about the same hour at *Neston*, having had a very good Passage. His Grace went hence this morning, proposing to be at *London* on Monday next.
